"Vocals" are a team effort.

The Bismarck is a rock band that plays rock music. Now located in the Seattle, Washington area, the four members and long-time friends hail proudly from **North Dakota** where they've played in various bands together on and off for over a decade.

The Bismarck is a big fan of hard work and staying independent. They book their own shows, release their own records, engineer their own recordings, silkscreen their own shirts, load their own gear, drive their own van and - grudgingly - write their own promotional materials.

Their songs are loud, punishing and laced with a dark sense of humor. If your music collection is home to bands like Shellac, A Minor Forest, Unwound and Engine Kid, The Bismarck's records will find a comfortable place on your shelves.

What Price Victory? is the first full-length release by The Bismarck, following two limited edition EPs in 2003 (**s/t** and **We Don't Bring the Weak Shit**).
